

Service

EUROPEAN WHEELSET CENTRE

MAINTENANCE

AT GHH-VALDUNES WE ARE COMMITTED TO ENSURING WORRY-FREE OPERATIONS TO OUR CUSTOMERS

In the business of freight logistics, we realise that keepers and maintenance shops absolutely need an unquestionable level of safety for the wheelsets of the wagon fleet they take care of. Safety in operations is a critical matter for the other stakeholders of the freight community as well: final customers who let their goods carried; regulators in charge of upholding the standards, regulations or laws applicable to freight cars and insurers who underwrite the risks linked to rail operations.

We also measure the ever-growing economic pressure imposed on freight operations. The recent deregulation of the European markets exacerbates competition. A wagon needs to be in service as much as possible, with the quickest possible time dedicated to overhauls at an economically sensible cost. Wheelsets shall follow the same logic: fast repair at a competitive cost.

GHH-VALDUNES has devised its service offer for wheelset maintenance with those two prerequisites clearly in sight. **Our wheelset service centre repairs wheelsets with worn wheels in 15 working days, while observing the most severe quality controls, which characterise the products of GHH-VALDUNES group.**

The wheelset maintenance service of GHH-VALDUNES combines uncompromised safety with very short lead times and competitive costs.

 Wherever you need us

MORE THAN
100 TYPES
OF WHEELSETS

LEAD TIME:
15 WORKING DAYS

Service

EUROPEAN WHEELSET CENTRE

MAINTENANCE

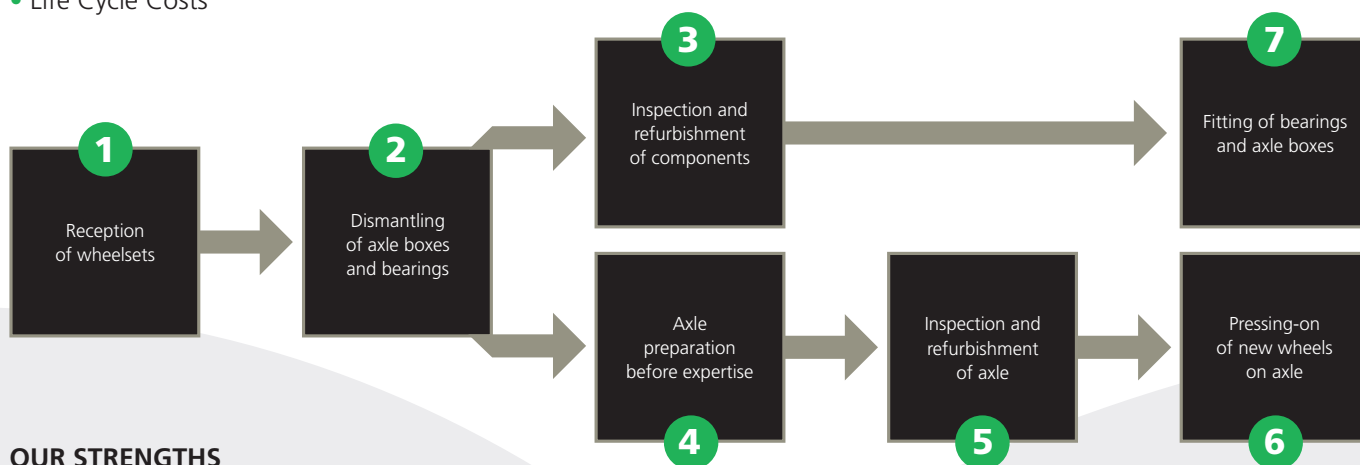

KEY DELIVERABLES

- Safety
- Availability
- Reliability
- Spare parts management
- Life Cycle Costs

YOUR BENEFITS

Compliance to the tighter standards imposed to wheelset maintenance. **Improved availability** of rolling stock. **Reduction of working capital** requirements.

OUR STRENGTHS

- Seamless processes: Supply chain, Traceability and Inspection.
- Maintenance processes adapted to customer's referential.
- Maximum safety, shortest lead time (15 working days) and a cost-effective service.
